

## GTS - A STEP INTO INDUSTRY

Ian Chitty and Matthew Wilson presented "A Step Into Industry" at the Careers Conference at Cardiff University Catalysis Institute on 8<sup>th</sup> June.

In attendance were PhD and Postdoc students from Cardiff, Bristol, Bath and Exeter Universities. Other speakers on the day included Dr John Bower, University of Bristol and Professor Andrew Beale, University College London.

## NEW HIGH TEMPERATURE INSULATION TAPE FOR EV BUSBARS

Under its Powerline brand GTS is adding a range of materials that have the capability to withstand higher Maximum Operating Temperatures (MOT).

Electrical and electronics components in Electric Vehicles are packaged together more densely making it difficult for efficient heat dissipation. Close placement of power modules to the electrical engine also exposes the laminated busbars to direct heat.

The new insulation tapes of our GTS3480HT series are made with a high temperature UL approved polyester film and a modified epoxy adhesive which are designed for an MOT of 130°C and have very good humidity resistance. Several material constructions are available.

## GTS U.S. MOVES INTO NEW OFFICE

After more than 20 years at Brownlee Blvd. it was time to look for a new location for our U.S. sales office. Not far away and still in Warwick we were lucky to find an office in a modern condominium building which offers almost the exact space but with a better lay-out. Accessibility is also more convenient due to close proximity to highway 95.

Ron is looking forward to welcoming visitors at 469 Centerville Rd, Suite 106 in Warwick, RI 02866.

## ACHIEVEMENTS

Congratulations to GTS's two maintenance apprentices, both of whom, have achieved significant milestones in the last few weeks.

David Williams, in the fourth year of his apprenticeship with GTS, has completed his HNC in Electrical and Electronic Engineering, passing with merit and a distinction in the Electronics 1 module. Shortly, David will complete the final stages of his apprenticeship and become a permanent member of the GTS maintenance team.

In addition, Jordan Young has successfully completed the first two years of his apprenticeship. Jordan obtained a City and Guilds Level 3 merit in Mechanical Engineering and will now be moving on to the next stage of his apprenticeship with the Company.

## QUICK NEWS

GTS will exhibit at **Productronica** November 14-17, 2017, booth B3 439

Our **TS16949** surveillance audit was completed without any non-conformance items

Job Postings are now also published on our website. See "**Career**" for exciting employment offers.
