

NEW COLLABORATIONS

As already announced GTS and **Doosan Electro-Materials** have agreed on a manufacturing and distribution partnership for GTS proprietary PEN based flex materials. The focus of Doosan's activities will be on the fast-growing market for battery interconnections in South Korea.

To better address the specific technical requirements in the U.S. GTS has partnered with **Cactus Materials**, based in Chandler, AZ. Cactus have some unique technical capabilities in the field of flexible electronics and roll-to-roll manufacturing. Technical support, product engineering and innovation will be our strong selling points to the domestic FPC industry.

GTS 2020

As part of its ongoing GTS 2020 programme of improvements GTS has recently completed the next stage of refurbishment and **modernisation**. A total revamp of the staff canteen area along with a separate quiet room with relaxing chairs has been finished. Environmentally-friendly lighting has been installed throughout the production area with further upgrade projects planned for this year.

Further expansions in our **capacity** have also been completed by installation of a new wide width coater and slitter.

PERSONNEL ACHIEVEMENTS

GTS Flexible Materials are proud of the long service achievements of its staff. The next group of staff that have worked for GTS for **25 years** are David Green (Production), Glenn Hancock and Wayne Thomas (Stores).

They were presented with a company gift at a staff appreciation dinner held by GTS at the Old Rectory Hotel Llangatock. We would like to thank them for their dedicated hard work to the company over the years and hope they continue for many years to come.

We also congratulate Mareen Weber, Sales Service Manager at our German office for completing her advanced training as a **Key Account Manager**.

GTS NEW APPOINTMENTS/STAFF

GTS has been actively recruiting and has taken on further new staff in various roles within the company. Richard Redei has joined our team in Germany to take up the role of **Applications Engineer** for our European customer base. Richard has a background in chemical engineering and will be the technical interface for customers.

Also, we welcome Daniela Chadt-Broszat. She has joined the sales service team in our Germany Office as Sales Service Administrator.

GTS vacancies can be found on our Web page under the Careers section: www.gts-flexible.com

GTS EXHIBITIONS 2018

We attended **PCIM Asia** in June, together with our partner Grandmake, at a GTS booth where we specifically highlighted our high temperature busbar insulation materials for automotive applications.

Demand for xEV in China is growing and GTS's range of **Powerline products** offer the right capabilities to meet the required operating temperatures.
